

# Precision Paddle Fit 20

## Quick and accurate marker for the Adams Rite push paddle.

Need to change the paddle hand?  
No more escaping micro e-clips!

The **Precision Paddle Fit** quickly and accurately marks the mounting holes for the Adams Rite push paddle. Faster than measuring the hole locations from the centre line. Safer than using the paddle body as a template. Eliminates risk of scattering the mechanism.

**Bonus!** The small metal blade on the end of the Precision Paddle Fit safely removes the micro e-clip from the cam disc to facilitate changing the hand.
